

CamTech University

**Towards an Innovation-focused
Entrepreneurial University**

2023/2024

Message from the Chairman

Cambodia's economy is moving quickly and now more than ever local education system needs to develop and support the growth of local talents in fields of modern technologies, science, engineering, social sciences, arts and understanding these urgent needs, CamTech is here to lead the enhancement of the most demanded technical disciplines. A recent report indicates students learning science and technology related fields are only account for 30% of all university students in Cambodia while those studying non-STEM fields like languages, banking and finance, accounting, hospitality is 70%. Realistically the market demand of data analysts, data scientists, robotic and automation technicians, AI solutions, machine learning tools is increasing day by day. CamTech aims to disrupt the mentality based on which when Cambodia needs top professional solution, must hire a foreigner company or a foreigner expert only. We believe in cultural sharing and shared opportunities for intellectual valuable profiles, but we focus on motivate and train local resources to reach the international standards needed. It is one of our duties to provide top trainings for any level of learner: from university students to adults that will want to develop new high demanded skills or learn how to transfer their already acquired skills to find new well paid job opportunities, to business professionals that will need to sharpen their knowledge and abilities. CamTech promotes exchanges with overseas Universities, including in China and is developing internship programs with top local and regional companies for our students. Most of these hand-on project programs that will integrate and put in action the theoretical knowledge acquired with us, will lead to official acquisition of our talents. CamTech will support all students to prepare for employments, entrepreneurship, and graduate studies as well as to prepare them to live in and adapt a fast changing and highly connected world.

Neak Oknha Dr. Pung Kheav Se,
Chairman of the Board of Trustees

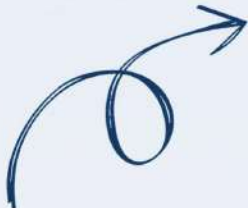

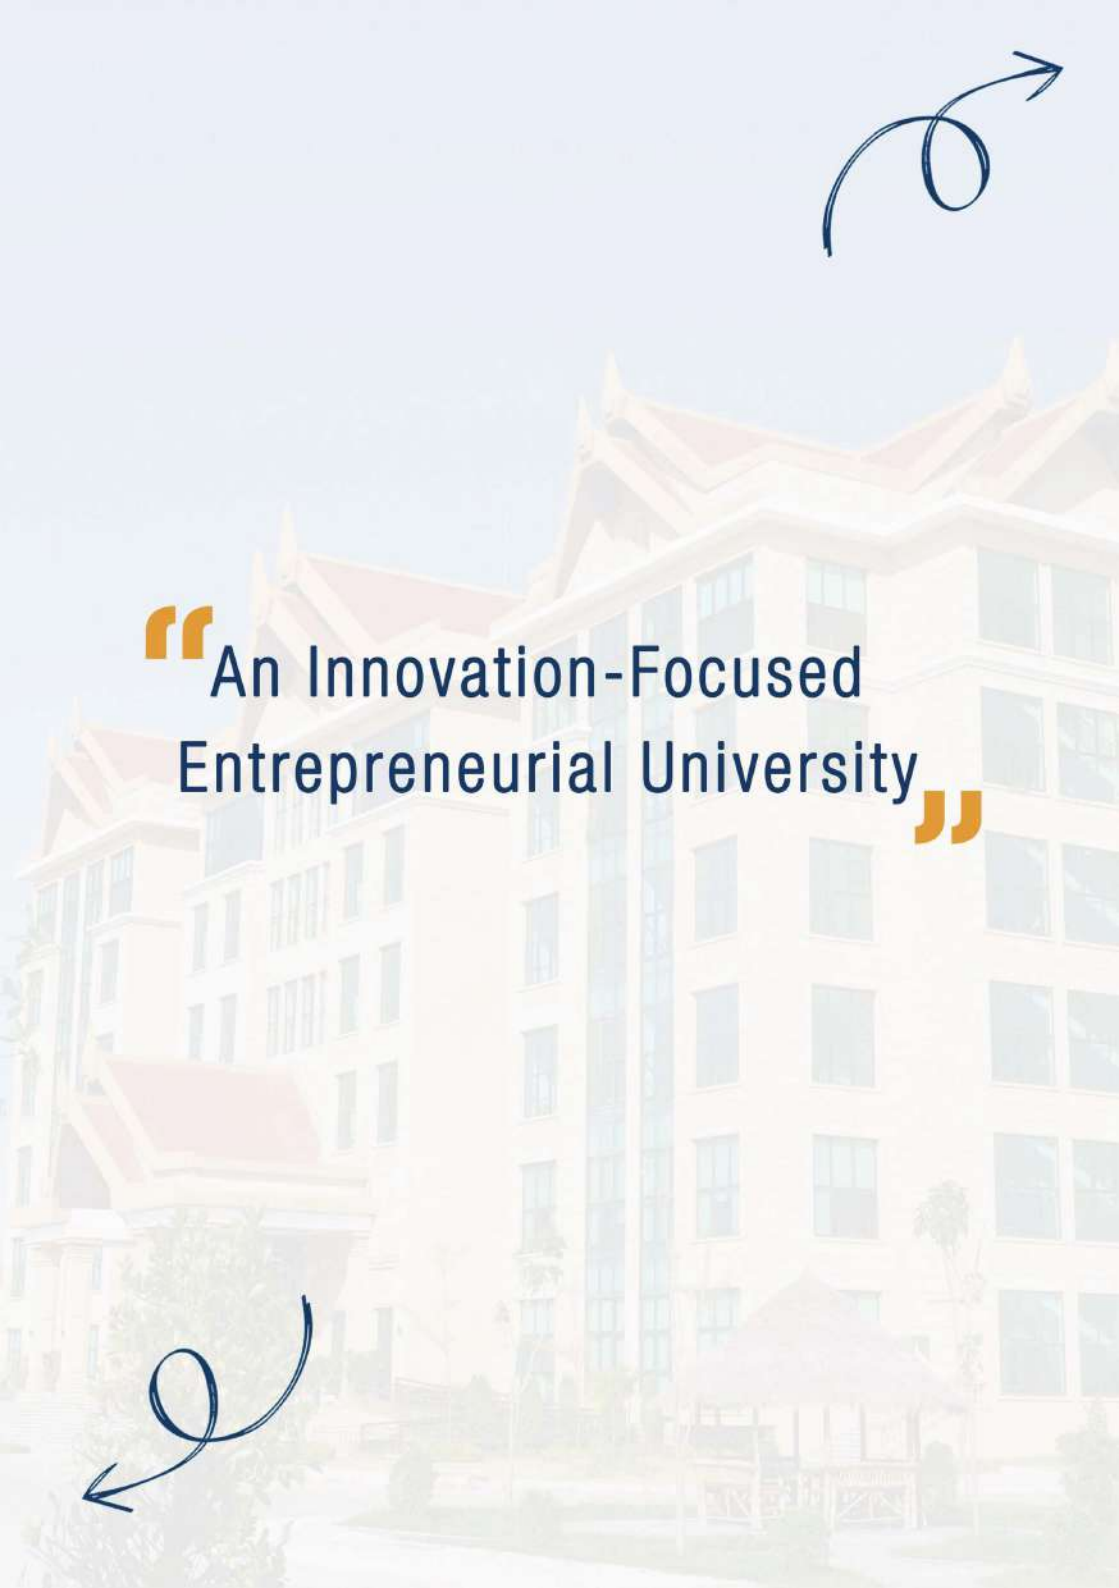

Welcome to CamTech University

To achieve the vision of a digital economy and society as well as a middle income country by 2030, our nation must have a strong foundation of human capital, including highly skilled, educated and responsible citizens. I envision that CamTech, as an innovation-focused entrepreneurial university, will play an important role in rebranding Cambodia as a knowledge, technology and startup hub and achieve Cambodia's sustainable development aspirations. But above all, I wish to lead programs to educate experts and leaders in fields like Software Engineering, Data Science, AI, and Robotics. Our ambition is to turn our graduates into practitioners and leader of digital technology that is the pillar of Cambodia industrialization.

As the Founding President, I humbly invite other universities and research institutes as well as other stakeholders to join CamTech to build our country's innovation ecosystem.

Dr. Sothy KHIENG
President
Cambodia University of Technology and Science

**“An Innovation-Focused
Entrepreneurial University”**

01.University Background

During the meeting with the Founder and the Representative of Tianjin University of Technology, HE Dr Hang Chuon Naron, the Minister of Education, Youth and Sport, expressed his full support to the project of CamTech University.

The idea of a university was the brainchild of Neak Oknha Dr. Pung Kheav Se in 2018 to enable young talents to receive a high level of tertiary education. The university was named the Cambodia University of Technology and Science (CamTech) and receives support from the Federation of Khmer-Chinese in Cambodia with an aim to cultivate Cambodian young professional talents in science and technology and enhance Cambodia's economic development. In return, CamTech will equip their students with academic and hands-on training, which will increase their employability and contribute to the development of Cambodia.

In March 2021, CamTech received the official approval from the Royal Government of Cambodia to operate with the establishment of five faculties: the Faculty of Engineering, the Faculty of Arts, Humanities and Social Sciences, the Faculty of Business and Management, the Faculty of Applied Science, and the Faculty of Sustainable Built Environment.

Neak Oknha Pung Kheav Se Foundation

To contribute to the establishment of the university, Neak Oknha Pung Kheav Foundation (the Foundation) was founded. The Foundation has provided 5 hectares of land in Chroy Changva Satellite city as the campus of the CamTech University, and invested more than \$3 million to build the campus with the main university building, state of the art facilities, a garden and a canteen.

Vision

Mission

Core Values

and Our Motto

Vision

To be a leading university with an international reputation for academic excellence in the fields of Science and Technology underpinned by a work-integrated learning framework.

Mission

To offer applied research and innovation-focused education to transform lives that respond to industrial development and socio-economic growth needs.

Core Values

Integrity
Respect
Excellence
Innovation
Diversity

Our Motto

Knowledge
Reason
Character

02. Why choose CamTech?

Employability

- Project-based work integrated learning experience
- Entrepreneurship and leadership skills
- Teaching informed by research and innovation
- Industry and business linkage for job placement
- Support for start-ups and business innovation
- English as a medium of instruction language

Highly Qualified and Experienced Faculty Members

- Full-time lecturers & world-class researchers
- All lecturers completed a post-graduate certificate of teaching and learning

Contributes to Cambodia's Socio-Economic Growth and Development

- Addressing the challenges of Cambodia and the region
- Contributing to the Sustainable Development Goals (SDGs)
- Promoting diversity and multiculturalism

Outstanding Facilities

- Sports Complex: Gym, basketball, volleyball, football, table tennis, and badminton
- Labs: Robotics, AI Lab4 Education, makerspace, and start-up studio
- Research Centers: Social Innovation & AI, Big Data & Cyber security (ABC)
- Brand-new campus on a 5-hectare space with green environment, equipped with digital and physical library facilities.

04. Undergraduate Programs

►► Faculty of Engineering

In the Faculty of Engineering, we offer 14 majors for prospective students to choose from:

- Robotics and Automation Engineering
- Cyber Security
- Data Science and Artificial Intelligence Engineering
- Software Engineering
- FinTech and Digital Banking
- Power and Energy Engineering
- Electrical and Electronic Engineering
- System and Control Engineering
- Electronics and Telecommunication Engineering
- Mechatronics Engineering
- Machinery Engineering
- Automobile Engineering
- Aerospace Engineering
- Industrial Engineering

►► Faculty of Applied Science

There are 3 majors to choose from:

- Industrial and Applied Mathematics
- Applied Statistics
- Computational Finance and Risk Management

►► Faculty of Arts, Humanities and Social Sciences

The faculty offers 11 majors to choose from:

- Fashion Design
- Teaching English as a Second Language
- English for Business and Commerce
- English for Translation and Interpretation
- Teaching Chinese as a Second Language
- Chinese for Business and Commerce
- Chinese for Translation and Interpretation
- Educational Leadership and Management
- Media and Communication Technology
- Educational Technology
- Education and Training

» Faculty of Business and Management

There are 8 majors to choose from:

- Construction Management
- Logistics Management
- Transportation Management
- Manufacturing Management
- Sports and Recreation Management
- Product Management
- Risk Management and Business Intelligence
- Innovation and Entrepreneurship

» Faculty of Sustainable Built Environment

There are 6 majors to choose from:

- Architecture
- Interior Design
- Urban Planning
- Property Management
- Land Administration and Management
- Industrial Energy Management

05. Tuition Fees

The tuition fees vary based on the chosen major of study. Students can pay the tuition fee for a term or a year (three terms per academic year).

A. Bachelor's Degree (4 years)

No.	Faculties (Fee bases on major)	Full Tuition Fee/Term			Full Tuition	Total Tuition
		Term I	Term II	Term III	Fee/year	Fee (4 years)
1	Engineering	\$1,334	\$1,334	\$1,334	\$4,000	\$16,000
2	Built Environment	\$1,334	\$1,334	\$1,334	\$4,000	\$16,000
3	Applied Science	\$1,334	\$1,334	\$1,334	\$4,000	\$16,000
4	Art, Humanities and Social Sciences	\$1,167	\$1,167	\$1,167	\$3,500	\$14,000
5	Business and Management	\$1,167	\$1,167	\$1,167	\$3,500	\$14,000

Other fees:

- Students pay an administration fee of \$200 per year (subject to change). For this fee, students will receive free year-round access to library services, lab services, start-up rooms, conferences, and a Student ID Card.
- Students are required to have a personal computer for self-study and other study activities.
- Students are responsible for other personal expenses such as study materials and other expenses.

06. Research and Innovation Centers

Research and Innovation

As a research-intensive university, research and innovation have been a core mission of CamTech because they are the key to ensure scientific advancements and Cambodia's socio-economic growth. Over the years, research centers have been founded to foster excellence in both pure and applied research, academic education, services, and scholarly collaboration. Currently, CamTech has six research centers.

- China Studies Center
- Cyber Study Network
- Comparative Education Society of Cambodia
- Center for Applied Mathematics
- Center for Socio-Economic Research
- J7 Heritage Science Lab

Social Innovation Center

CamTech's Center for Social Innovation promotes innovative solutions to address the challenges related to the Sustainable Development Goals and carries out activities that bring about "Society 5.0", which is sustainable, circular, and peoplecentered. We also support new models of doing business, new solutions, and new enterprises.

Our current activities include

- Nurture and grow startups and virtual businesses that promote sustainability and social economy
- Manage industrial placement
- Provide co-working space and resources
- Link CamTech to industries, academia, and government to build an ecosystem
- Incubate (social) enterprises
- Promote technology/knowledge transfer to industries.

▶ Short Training Courses/Micro-credentials

The Center for Professional Education and Training (CPET) works to empower lifelong learners and creates a lifelong learning society in Cambodia.

We design training courses and programs that focus on practical applications, workplace relevance, and development of forward-thinking ability to thrive in future uncertainty. On top of that, CPET functions as a school within CamTech providing short-term skills training and professional development programs to grow individuals' knowledge and proficiency with university-level education but without the time and cost commitment of a full degree. We also work closely with both public and private sectors to design on-trend and competency-based curricula that equip you with marketable qualification and expertise to meet current demand for skills and give you the competitive edge at workplace.

The 21st century is characterized by rapid change in science and technology, but with it, come the necessity to frequently adjust to the prerequisite of knowledge otherwise individual current set of skills will be deemed obsolete in a fairly short period. To CamTech, there is no such notion as finished education, but we also believe that adult education per se should not be limited only to formal academic degree. In addition, each individual has different pace of learning and attention interval. For this reason, individuals should be allowed for flexibility in their own appropriate learning styles.

07. Campus Facilities

Welcome to CamTech Library For Knowledge, Inspiration & Life

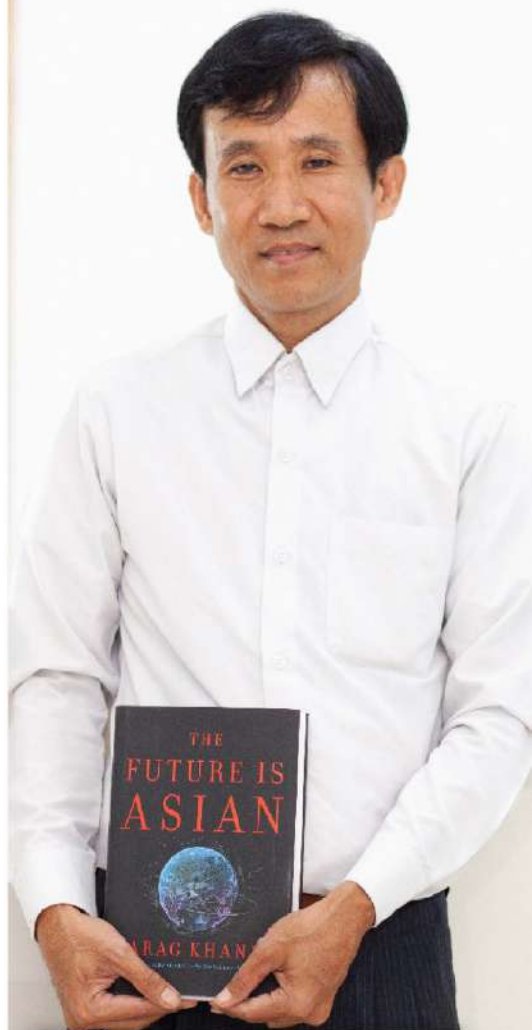

The Library

Collection

Since its establishment, the CamTech library has been a science knowledge hub for research. It houses a collection of print and non-print resources covering subject-specific topics relating to the arts, business, science and technology, social sciences, and humanities, and as well as provides access to online databases and electronic resources. The library's Online Public Access Catalog (OPAC) where you can search for items access your patron account, reserve books, and much more is accessible at <http://library.camtech.edu.kh/>.

Catalog

- Dewey Decimal Classification (DDC 21) with 4 volumes used to classify all kinds of library items.
- Integrated Library System, namely KOHA used to maintain and managed all types of resources available in the library.

Contact Information

Mr. Chheng Pharin, Librarian

Phone: 070 666 275

E-mail: pharin.chheng@camtech.edu.kh

In person: Visit us at Help Desk in the library.

Library Services & Facilities

The following services & facilities are offered to the users:

- Personalized Library Account (Login ID & PWD to each users) through web OPAC
- Online Book Suggestions/Circulation Services (Loan, online reservation, renewal of items, etc.)
- Reference Services & Library Orientation Program
- Photocopy/Printing/Scanning
- Group Study Room (Breakout Room)
- Computers equipped with multimedia and internet facilities and TV
- Galaxy Tablets

More services and facilities will be initiated in near future.

Library Opening Hours

During academic terms	Timings
Monday to Friday	8:00 AM to 5:00 PM
Weekend (Saturday)	8:00 AM to 12:00 PM
Closed on national holidays Note: Its additional opening hours will be soon extended.	

CamTech Dormitory

One among the many special offers from CamTech is student accommodation. Students who come from provinces do not need to spend time looking for accommodation as CamTech provides the students with accommodation, which is in close proximity to the university campus, in safe areas, and with all the basic facilities.

Who and How

1. Who Currently studying at CamTech
2. Residence is at the province (remote area is plus)
3. Female students, and students with disability and financial needs.

You may apply online here
